## **Reflective Practice**

It is time for you to reflect on your learning throughout this work term preparation course.

Answer the following question with a minimum of 200 words:

1. What have you learned throughout this work-term preparation course and how has it shaped or changed your career path?

This work-term prep course has been a big help in getting me ready for job hunting. The resume and cover letter modules cleared up a lot of confusion I had, and they gave me a really solid roadmap to follow. I feel way more confident about structuring my documents to highlight my strengths. Even though I ran into some setup issues during the interview module, the content still came through with some great tips. The advice on what to wear, how to answer questions, and what to ask during an interview was super practical. I never realized how important it is to prepare your own questions, and now I feel more comfortable knowing what to expect in an interview. All in all, the course has given me a much better sense of how everything fits together when applying for jobs. It's also helped calm some of that imposter syndrome, especially since I'm stepping into a new field. I feel a lot more prepared now to go after programming positions, knowing how to tackle the application process from start to finish. This course has made the whole thing less intimidating, and I'm feeling more confident about the next steps in my career. It's been a real confidence booster.
